## WORK EXPERIENCE

### University of Washington, Transportation Services

Seattle, WA

*Web Development Intern*

*March 2024 – June 2024*

- Led the development of an interactive web application for campus-wide use, resulting in a 50% reduction in parking search time and a 30% rise in user satisfaction, as validated by a comprehensive campus survey.
- Enhanced parking space discovery with JavaScript, React, and GIS integration, leading to a 95% accuracy in real-time availability, and supporting over 50,000 students and faculty in efficient campus navigation.
- Collaborated with UI/UX designers to streamline parking lot navigation, contributing to a 20% decrease in peak-hour campus traffic and significantly improving the daily transportation experience.

### Helping Link / Một Dấu Nối

Seattle, WA

*Web Development Volunteer*

*August 2022 – January 2023*

- Revitalized the Helping Link website with a team of volunteers using WordPress, resulting in a 20% increase in user engagement while utilizing Agile methodologies to ensure iterative progress and team collaboration.
- Implemented project management tools like Figma and Jira to distribute tasks efficiently, increasing team productivity by 40% and ensuring on-time delivery of website enhancements.
- Analyzed user behavior via Hotjar, leading a redesign of the site's UI/UX that improved navigation efficiency by 30% and substantially enhanced visitor satisfaction and accessibility.

## PROJECTS

### Rael & Letson

Seattle, WA

*Front-End Developer*

*January 2024 – June 2024*

- Led the front-end development of a user-centric web application for Real & Letson, targeting elderly users with enhanced accessibility and user experience using PostgreSQL, Python, JavaScript, HTML, and CSS, thereby projected to increase user engagement with retirement plans by 40% within the first year.
- Collaborated with a team of 4 to integrate advanced back-end calculations into the platform, ensuring the delivery of accurate and real-time retirement savings estimates to over 5,000 multiemployer pension plan participants.
- Project was awarded the Information School Capstone Design Award for excellence in design and implementation.

### Foodie Finder

Seattle, WA

*Full-Stack Developer*

*September 2023 – December 2023*

- Spearheaded the development of 'Foodie Finder', a tailored web platform for UW students, leveraging Express.js and MongoDB to manage a database of 50+ user profiles with real-time data handling and security protocols.
- Integrated Yelp Fusion API to devise a dynamic recommendation system, improving dining choices personalization which led to a 30% increase in user engagement and a 25% uplift in return visits within the first two months of launch.
- Hosted the platform on Microsoft Azure to ensure scalability and reliability.

## LEADERSHIP EXPERIENCE

### Unite UW Student Association (UUSA)

Seattle, WA

*Director of Web Development*

*September 2023 – June 2024*

- Led a team of web development officers in managing the Unite UW Student Association website, resulting in a 35% increase in merchandise sales and 50% more event registrations due to timely and impactful content updates.
- Collaboratively established a content management workflow, improving content update efficiency by 60% and maintaining the website's relevance for over 100 active members and prospective students.
